The ABCs of Keeping Allergens Out

Attract dust — don't just move it around — by dusting with a damp cloth.

Block allergens from coming in by regularly cleaning entryways.

Close windows and use an air conditioner with a high-efficiency filter.

Common Spring Allergens

Watch the Pollen Count! Plan outdoor activities for when the pollen counts are low. Remember that pollen and mold levels are typically higher in the mornings.

Keep Antihistamines on Hand! These medications target histamine, which is what causes watery eyes, runny noses, and nasal congestion during an allergic reaction.

Going Places!

IMMUNIZE HERE. BE SAFE THERE.

Before going on your life-changing journey, make sure you're protected!

Your checklist is a mile long; be sure to add your physician high up on the list. Then visit cdc.gov/travel to find out which vaccines are recommended for where you are going.

Mark your calendar for your vaccines, as many need to be administered well in advance of your travel date. Call us to schedule those vaccines.

We offer many travel vaccines and can consult if you aren't sure which immunizations you should really get for some areas of the world.

CALL US TODAY! 969-634-3006 903 W. Frank Ave. | Lufkin, TX 75904

SINGLE-DOSE BUBBLE PACKAGING

We at Vida Pharmacy want to make it as easy as possible to take medications at the right dose and the right time.

Our simplest method of specialty packagins is the single-dose bubble packs, also called bingo cards.

We can package each medications in its own card to quickly tell if the dose has been taken.

This is a great option for those that don't need much assistance but could benefit from their prescriptions being more organized.

GET STARTED TODAY!

(505) 856-1660 | VidaPharmacy.com 8500 Jefferson St. NE | Albuquerque, NM 87113

DISPILL MULTI-DOSE BLISTER PACKAGING

Are your residents taking multiple medications every day? Dispill multidose blister packaging is a great option for organizing those prescriptions.

Your meds will be sorted by time and day of dose and packaged into individual dosage packs. Each pack can be individually removed from the card, so you can take it with you with ease.

This method is popular with those in independent living or home care.

PARATA MULTI-DOSE STRIP PACKAGING

Parata strip packaging is a multi-dose system that organizes your residents' medications by dosage date and time and packages each dose an a tearaway pack.

This system is automated, greatly decreasing the chance of error. It is easy to view and verify that all pills are accounted for in each pack, which makes this option great for assisted living and nursing home facilities.

PNEUMONIA

vaccine available for ages 65+

Pneumonia is an infection of the lungs that affects millions of people each year; and people with certain chronic conditions are at a greater risk.

WHO SHOULD GET A PNEUMONIA VACCINE?

The CDC recommends vaccination for all children younger than 2 years old and all adults 65 years and older.

There are 2 kinds of vaccines to help prevent pneumococcal disease:

- Pneumococcal conjugate vaccine
- Pneumococcal polysaccharide vaccine

540 East Fifth St. | Washington, MO 63090 www.SchroederDrugs.com
